- Computer Science

## SKILLS

### Technical Skills:

- Frontend: HTML, CSS, JavaScript, TypeScript, React
- Backend: PHP, Express.js
- Programming Languages: C++, Java

### Soft Skills:

- Project Management
- Teamwork
- Leadership

## LANGUAGES

- Arabic: Fluent
- English: Fluent
- Turkish: Advanced

## CERTIFICATIONS

- Udacity Intro to Programming Nanodegree

## WORK EXPERIENCE

### Full Stack Developer

2024 - PRESENT

Sada Intelligent Solutions

- Currently undergoing hands-on training in full-stack web development.
- Completed modules in HTML, CSS, JavaScript, Bootstrap, React with TypeScript, Node.js, and Express.js.
- Contributed to multiple real-world projects and practical applications, both individually and within teams.
- Developed strong skills in building responsive front-end interfaces and robust back-end services.

## PROJECTS

### • Online Quiz Platform / Tech Stack: React

Developed an interactive online quiz application with dynamic question handling and automatic score calculation. Designed intuitive UI and implemented core logic.

### • Student Registration System / Tech Stack: HTML,CSS, JavaScript

Worked as part of a team to build a web application for managing student registrations in the training program I participated in. Focused on front-end development and user experience.

### • News Website (University Project) / Tech Stack: PHP, HTML, CSS, JavaScript, Bootstrap

Designed and developed a dynamic news website inspired by Al Araby, featuring article creation, category filtering, and responsive layout. Built both front-end and back-end components.
